Deleted status in training.gov.au

Feedback from users and an [agreement](#) from State and Territory Ministers, a new "Deleted" status has been introduced in training.gov.au (TGA). The implementation of the status will occur in two phases.

The first phase will see the Deleted status expanded to all relevant training packages and their components (including Enterprise training packages) currently marked as superseded with no replacement. This was completed in late November.

The second phase will see the Deleted status expanded to all relevant training packages and their components currently marked as superseded with no replacement. Any training packages or components currently marked as superseded with no replacement will have their status updated to Deleted. Any training packages or components released following the implementation of this criteria will also be marked as Deleted. The second phase is scheduled for early 2017.
