The ACT Senior Secondary System

The ACT senior secondary system recognises a range of university, vocational or life skills pathways.

The system is based on the premise that teachers are experts in their area: they know their students and community and are thus best placed to develop curriculum and assess students according to their needs and interests. Students have ownership of their learning and are respected as young adults who have a voice.

A defining feature of the system is school-based curriculum and continuous assessment. School-based curriculum provides flexibility for teachers to address students' needs and interests. College teachers have an opportunity to develop courses for implementation across ACT schools. Based on the courses that have been accredited by the BSSS, college teachers are responsible for developing programs of learning. A program of learning is developed by individual colleges to implement the courses and units they are delivering.

Teachers must deliver all content descriptions; however, they do have flexibility to emphasise some content descriptions over others. It is at the discretion of the teacher to select the texts or materials to demonstrate the content descriptions. Teachers can choose to deliver course units in any order and teach additional (not listed) content provided it meets the specific unit goals.

School-based continuous assessment means that students are continually assessed throughout Years 11 and 12, with both years contributing equally to senior secondary certification. Teachers and students are positioned to have ownership of senior secondary assessment. The system allows teachers to learn from each other and to refine their judgement and develop expertise.

Senior secondary teachers have the flexibility to assess students in a variety of ways. For example: multimedia presentation, inquiry-based project, test, essay, performance and/or practical demonstration may all have their place. College teachers are responsible for developing assessment instruments with task specific rubrics and providing feedback to students.

The integrity of the ACT Senior Secondary Certificate is upheld by a robust, collaborative, and rigorous structured consensus-based peer reviewed moderation process. System moderation involves all Year 11 and 12 teachers from public, non-government and international colleges delivering the ACT Senior Secondary Certificate.

Only students who desire a pathway to university are required to sit a general aptitude test, referred to as the ACT Scaling Test (AST), which moderates student scores across courses and colleges. Students are required to use critical and creative thinking skills across a range of disciplines to solve problems. They are also required to interpret a stimulus and write an extended response.

Senior secondary curriculum makes provision for student-centred teaching approaches, integrated and project-based learning inquiry, formative assessment, and teacher autonomy. ACT Senior Secondary Curriculum makes provision for diverse learners and students with mild to moderate intellectual disabilities, so that all students can achieve an ACT Senior Secondary Certificate.

The ACT Board of Senior Secondary Studies (BSSS) leads senior secondary education. It is responsible for quality assurance in senior secondary curriculum, assessment, and certification. The Board consists of nominees from colleges, professional bodies, universities, industry, parent/carer organisations and unions. The Office of the Board of Senior Secondary Studies (OBSSS) consists of professional and administrative staff who support the Board in achieving its objectives and functions.

ACT Senior Secondary Certificate

Courses of study for the ACT Senior Secondary Certificate:

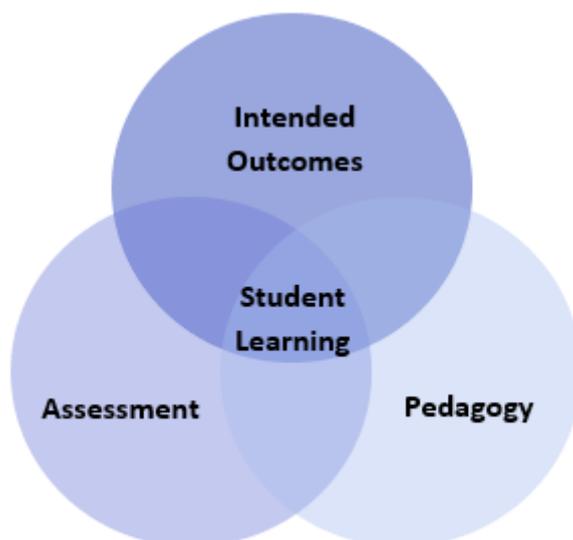

- provide a variety of pathways, to meet different learning needs and encourage students to complete their secondary education
- enable students to develop the essential capabilities for twenty-first century learners
- empower students as active participants in their own learning
- engage students in contemporary issues relevant to their lives
- foster students' intellectual, social, and ethical development
- nurture students' wellbeing, and physical and spiritual development
- enable effective and respectful participation in a diverse society.

Each course of study:

- comprises an integrated and interconnected set of knowledge, skills, behaviours, and dispositions that students develop and use in their learning across the curriculum
- is based on a model of learning that integrates intended student outcomes, pedagogy, and assessment
- outlines teaching strategies which are grounded in learning principles and encompass quality teaching
- promotes intellectual quality, establish a rich learning environment, and generate relevant connections between learning and life experiences
- provides formal assessment and certification of students' achievements.

Underpinning beliefs

- All students are able to learn.
- Learning is a partnership between students and teachers.
- Teachers are responsible for advancing student learning.

Learning Principles

1. Learning builds on existing knowledge, understandings, and skills.
(Prior knowledge)
2. When learning is organised around major concepts, principles, and significant real-world issues, within and across disciplines, it helps students make connections and build knowledge structures.
(Deep knowledge and connectedness)
3. Learning is facilitated when students actively monitor their own learning and consciously develop ways of organising and applying knowledge within and across contexts.
(Metacognition)
4. Learners' sense of self and motivation to learn affects learning.
(Self-concept)
5. Learning needs to take place in a context of high expectations.
(High expectations)
6. Learners learn in different ways and at different rates.
(Individual differences)
7. Different cultural environments, including the use of language, shape learners' understandings and the way they learn.
(Socio-cultural effects)
8. Learning is a social and collaborative function as well as an individual one.
(Collaborative learning)
9. Learning is strengthened when learning outcomes and criteria for judging learning are made explicit and when students receive frequent feedback on their progress.
(Explicit expectations and feedback)

General Capabilities

All courses of study for the ACT Senior Secondary Certificate should enable students to develop essential capabilities for twenty-first century learners. These 'capabilities' comprise an integrated and interconnected set of knowledge, skills, behaviours and dispositions that students develop and use in their learning across the curriculum.

The capabilities include:

- literacy
- numeracy
- information and communication technology (ICT)
- critical and creative thinking
- personal and social
- ethical understanding
- intercultural understanding

Courses of study for the ACT Senior Secondary Certificate should be both relevant to the lives of students and incorporate the contemporary issues they face. Hence, courses address the following three priorities. These priorities are:

- Aboriginal and Torres Strait Islander histories and cultures
- Asia and Australia's engagement with Asia
- Sustainability

Elaboration of these General Capabilities and priorities is available on the ACARA website at www.australiancurriculum.edu.au.

Literacy

Students develop their literacy skills through exploring visual arts that display a range of styles, forms, and conventions. They analyse, create, research, evaluate and appraise visual art concepts and theories. In Visual Arts, students communicate with a variety of audiences, using appropriate mediums and methods of communication. Literacy in Visual Arts involves reading, writing, viewing, listening, and speaking. Students extend their vocabulary through the use of metalanguage. They express and communicate ideas and understand the use of language for different purposes in a range of contexts. Visual Arts provides the opportunity for students to expand their individual and collaborative communication skills to articulate knowledge and understandings.

Numeracy

In Visual Arts, numeracy involves students recognising and understanding the role of mathematics in the world and having the dispositions and capacities to use mathematical knowledge and skills purposefully. Visual Arts students select and use mathematical approaches to problem solving, mathematical formulae, ratios, making inferences, posing, and proving arguments and interpreting data. Students use a range of numerical concepts to organise, analyse and create art works.

Information and Communication Technology (ICT) Capability

Students extend their understanding of the range of technologies when developing skills, techniques, and processes to produce and promote art works. They select and incorporate technology where appropriate, to support their creative and critical thinking endeavours. Students develop awareness of emergent technologies and possible applications to art works. They use and adapt technological methods to take risks. Students use digital technologies to locate, access, select and evaluate information, work collaboratively, share and exchange information as well as to create art works.

Critical and Creative Thinking

Students develop skills to think critically and creatively through using the knowledge, understanding and skills developed in the Visual Arts course. They use these skills to find solutions to creative problems, including the investigation of new possibilities for achieving aesthetic outcomes in art works. Through engaging with visual art concepts and theories, students develop their sense of self and others in the world.

The process of making and presenting art works gives students opportunities to develop skills in interpreting, researching, revising, and refining, as well as problem-solving, goal setting and decision-making. Responding in visual art involves cognition, emotion, and intuition and engages students in interpreting, evaluating, and reflecting.

Personal and Social Capability

Students have the opportunity to develop their curiosity and imagination, creativity, personal identity, self-esteem, and confidence. The study of Visual Arts empowers students to understand and influence their world through exploring perspectives, situations, symbolic expression, and communication. As they make and respond to art works, students develop their intellectual, social, physical, emotional, and moral domains. They also have opportunities to improve their skills in experimentation, self-discipline, teamwork, and leadership.

Learning in visual arts is a cooperative process, developing students' intrapersonal and interpersonal awareness. The skills associated with managing personal resources to achieve goals in a timely fashion are refined and developed. Students learn by participating in creative problem-solving; generating, analysing, and evaluating ideas; developing and expressing concepts; learning to set goals and working collaboratively to achieve them; as well as presenting their product. They build personal and social capability through evaluating and reflecting on their art works.

Ethical Understanding

Students engage in a variety of challenges and opportunities in Visual Arts and in doing so encounter a broad range of ethical issues. They explore artistic, social, environmental, political, legal, and economic issues, problem solving to understand cause and effect and achieving a solution. The development of visual arts involves an understanding of, and working with, social, moral, and legal requirements. Experiences in visual arts can work to counteract discrimination and practice inclusion and equity, by developing understanding and empathy for others regardless of diversity of ability, gender, sexuality, cultural and linguistic background, and socio-economic background.

Intercultural Understanding

Intercultural Understanding is developed in Visual Arts through exploring their own perspectives and the perspectives, values and attitudes of others and extending students' global awareness and their appreciation of cultural diversity. Students learn about the nature, function and purposes, forms, and styles of visual arts in different cultures and contexts. In developing an historical perspective on visual arts, students understand how communities' cultural and social identities are shaped and how they function in today's world.

Cross-Curriculum Priorities

Aboriginal and Torres Strait Islander Histories and Cultures

The study of Visual Arts provides opportunities to learn about First Nations Australian cultures and traditions. First Nations Australian cultures carry an ancient tradition into the present with stories that communicate histories and contemporary experiences that are unique, and yet share parallels with other ancient cultures. Exploration of the history, and cultures, and art practices of First Nations Australian artists, provides a rich opportunity to build a greater understanding, as well as fostering values of mutual understanding and respect between cultures.

Asia and Australia's Engagement with Asia

Visual Arts provides opportunities to explore artistic traditions from the Asian region, representing a highly diverse spectrum of cultures, traditions, and peoples. Engaging in a respectful exploration of particular traditions and narratives from Asian countries such as Japan, China, India, Indonesia, and Korea, will enable students to understand more deeply the values and histories of our near neighbours.

Sustainability

The study of Visual Arts is an opportunity to engage students in thinking critically about the world's future and fostering awareness of the role of the arts in developing social and environmental sustainability. The challenge of sustainability and the human impact on our environment such as the ongoing challenge of human overconsumption and production of waste can be explored through art works. This is achieved through engagement in creative problem solving to address sustainability issues and by exploring sustainable practices in the production of art.

Specialised Visual Arts

A/T/M

Rationale

The study of Visual Arts develops knowledge and understanding of traditional and contemporary art works through engagement with innovative art practice, curatorial appreciation, entrepreneurship, and interdisciplinary inquiry. Through exploration of traditional and non-traditional art forms, students develop the technical proficiency and confidence as art makers to communicate their ideas. They learn as consumers and art creators, by responding critically to art works, concepts, and theories, enriching their intercultural understanding. They critically and creatively analyse their world and develop curiosity, knowledge and understanding of the evolving and dynamic nature of the art industry.

Students learn as artists, by creating art products that engage audiences and communicate meaning, utilising art techniques. Art practice has the capacity to engage, inspire and enrich all students, excite their curiosity and imagination, and encourage students to reach their creative and expressive potential. They work collaboratively, independently, and ethically whilst making and responding to art works. Through the creative process, they develop capacity as problem solvers, risk takers, and critical and creative thinkers. They learn that art exists in process, as much as in finished art works and understand the collaborative nature of an interconnected art ecosystem.

Students develop transferable skills useful in any academic, professional, and vocational context, such as independence, collaboration, teamwork, and leadership. Visual artists become highly skilled at working with others and communicating clearly to achieve joint enterprises. They develop skills as researchers and engage with theories and ideas critically and creatively. Students engage with technologies and become adept at pivoting to new technologies that help them achieve their goals. They develop production skills and hone practices that present ideas and projects in ways that engage target audiences. Students develop empathetic awareness and skills in the practice of collaborating with others respectfully and using Work Health and Safety standards.

Goals

This course should enable students to:

- critically analyse how meaning is created and interpreted
- communicate meaning in a range of forms and mediums
- use inquiry and problems solving to synthesise styles, forms, processes, practices, and theories creatively to produce dramatic works
- apply critical and creative thinking skills
- refine and apply technical skills to create and present meaningful art works
- critically analyse the influence of a diverse range of contexts in visual arts
- reflect on creative processes and own learning
- apply skills to work safely, ethically, independently, and collaboratively.

Unit Titles

- Innovation in Visual Arts
- Curation and Exhibition
- Entrepreneurship in Visual Art
- Interdisciplinary Inquiry in Visual Arts
- Independent Study

Organisation of Content

Innovation in Visual Arts

Students learn about innovative art practice and practitioners who break with codes and conventions. They investigate innovations in technique, form, style, creation, digital platforms, and criticism and apply through experimentation and problem-solving. Students synthesise their knowledge, understanding and skills to expand their art practice and engage in ethical and aesthetic issues as artists and audience.

Curation and Exhibition

Students learn about stylistic and curatorial choices and how that positions audiences to interpret art works and conveys attitudes values and perspectives. They explore the representations of ideas in art as artists and curators through developing an informed response to art works and exhibitions they have seen and experienced. Students apply technical and curatorial skills to create their own works and exhibitions.

Entrepreneurship in Visual Arts

Students learn about entrepreneurship and the interface between art and industry. They explore the tensions and opportunities between creative and professional practice. Students apply their understanding of entrepreneurship in the art industry to produce authentic art works for a range of purposes and audiences.

Interdisciplinary Inquiry in Visual Arts

Interdisciplinary inquiry is an approach to studying and addressing complex problems or issues to explore new perspectives and advance critical thinking. Students develop skills in synthesising viewpoints, drawing conclusions, and exploring alternative applications of art practice. Students learn about how Visual Art can be used to learn about and communicate a wide range of concepts often considered the domain of other disciplines. They explore techniques for understanding, representing knowledge and concepts from other disciplines. Students apply Visual Art as a way of knowing the world and sharing their insights.

Independent Study

An Independent Study unit has an important place in senior secondary courses. It is a valuable pedagogical approach that empowers students to make decisions about their own learning. An Independent Study unit can be proposed by an individual student for their own independent study and negotiated with their teacher. The program of learning for an Independent Study unit must meet the unit goals and content descriptions as they appear in the course.

Independent Study units are only available to individual students in Year 12. A student can only study a maximum of one Independent Study unit in each course. Students must have studied at least three standard 1.0 units from this course. An Independent Study unit requires the principal's written approval. Principal approval can also be sought by a student in Year 12 to enrol concurrently in an Independent Study unit and their third 1.0 unit in this course of study.

Assessment

The identification of criteria within the achievement standards and assessment task types and weightings provides a common and agreed basis for the collection of evidence of student achievement.

Assessment Criteria (the dimensions of quality that teachers look for in evaluating student work) provide a common and agreed basis for judgement of performance against unit and course goals, within and across colleges. Over a course, teachers must use all these criteria to assess students' performance but are not required to use all criteria on each task. Assessment criteria are to be used holistically on a given task and in determining the unit grade.

Assessment Tasks elicit responses that demonstrate the degree to which students have achieved the goals of a unit based on the assessment criteria. The Common Curriculum Elements (CCE) is a guide to developing assessment tasks that promote a range of thinking skills (see Appendix C). It is highly desirable that assessment tasks engage students in demonstrating higher order thinking.

Rubrics are constructed for individual tasks, informing the assessment criteria relevant for a particular task and can be used to assess a continuum that indicates levels of student performance against each criterion.

Assessment Criteria

Students will be assessed on:

- making
- responding.

Assessment Task Types

The table below outlines making and responding weightings for the Arts: dance, drama, media, music, photography, and visual arts.

The Arts	
Task Types	<p>Schools ensure that assessment programs reflect a variety of task types include elements from Making, Responding, or a combination of both, to enable students to demonstrate the knowledge, skills and understandings reflected in the Achievement Standards.</p> <p>Tasks may include, but not limited to:</p> <ul style="list-style-type: none"> • performance • curating • installation • multimodal • composition • choreography • short films • ensemble theatre • sculpture • script writing • portfolio or body of work • critical essay • aural examination • research tasks • podcast • visual process diary • digital process diary • blog • directing • website
Weightings in A/T/M 1.0 and 0.5 units	No task to be weighted more than 60% for a standard 1.0 unit and half-standard 0.5 unit

Additional Assessment Information

- For a standard unit (1.0) students must complete a minimum of three assessment tasks and a maximum of five.
- For a half standard unit (0.5) students must complete a minimum of two and a maximum of three assessment tasks.
- Assessment tasks for a standard (1.0) or half-standard (0.5) unit must be informed by the Achievement Standards.
- Students must experience a variety of task types and different modes of communication to demonstrate the Achievement Standards.
- Duration, scope, or length of student responses should be determined by the nature of the task and requirements of the Achievement Standards.
- For tasks completed in unsupervised conditions, schools need to have mechanisms to uphold academic integrity, for example: student declaration, plagiarism software, oral defence, process journal, interview, or other validation tasks.

Achievement Standards

Years 11 and 12 achievement standards are written for A/T courses. A single achievement standard is written for M courses.

A Year 12 student in any unit is assessed using the Year 12 achievement standards. A Year 11 student in any unit is assessed using the Year 11 achievement standards. Year 12 achievement standards reflect higher expectations of student achievement compared to the Year 11 achievement standards. Years 11 and 12 achievement standards are differentiated by cognitive demand, the number of dimensions and the depth of inquiry.

An achievement standard cannot be used as a rubric for an individual assessment task. Assessment is the responsibility of the college. Student tasks may be assessed using rubrics or marking schemes devised by the college. A teacher may use the achievement standards to inform development of rubrics. The verbs used in achievement standards may be reflected in the rubric. In the context of combined Years 11 and 12 classes, it is best practice to have a distinct rubric for Years 11 and 12. These rubrics should be available for students prior to the commencement of an assessment task so that success criteria are clear.

Innovation in Visual Arts

Value: 1.0

Innovation in Visual Arts a

Value 0.5

Innovation in Visual Arts b

Value 0.5

Unit Description

Students learn about innovative art practice and practitioners who break with codes and conventions. They investigate innovations in technique, form, style, creation, digital platforms, and criticism and apply through experimentation and problem-solving. Students synthesise their knowledge, understanding and skills to expand their art practice and engage in ethical and aesthetic issues as artists and audience.

Specific Unit Goals

This unit should enable students to:

A	T	M
<ul style="list-style-type: none"> analyse innovations in Visual Arts analyse innovations in technique, form, style, creation, and digital platforms, create art works that explore new technical skills conduct Creative Inquiry into significant issues 	<ul style="list-style-type: none"> critically analyse innovations in Visual Arts synthesise innovations in technique, form, style, creation, digital platforms, and criticism create art works that incorporates innovative technical skills and perspectives conduct Creative Inquiry into significant issues 	<ul style="list-style-type: none"> describe innovations in Visual Arts apply new technical skills to the creative process explore examples of innovative art works to identify significant issues

Content Descriptions

All knowledge, understanding and skills below must be delivered:

A	T	M

A guide to reading and implementing content descriptions

Content descriptions specify the knowledge, understanding and skills that students are expected to learn and that teachers are expected to teach. Teachers are required to develop a program of learning that allows students to demonstrate all the content descriptions. The lens which the teacher uses to demonstrate the content descriptions may be either guided through provision of electives within each unit or determined by the teacher when developing their program of learning.

A program of learning is what a college provides to implement the course for a subject. It is at the discretion of the teacher to emphasis some content descriptions over others. The teacher may teach additional (not listed) content provided it meets the specific unit goals. This will be informed by the student needs and interests.

Assessment

Curation and Exhibition

Value: 1.0

Curation and Exhibition a

Value 0.5

Curation and Exhibition b

Value 0.5

Unit Description

Students learn about stylistic and curatorial choices and how that positions audiences to interpret art works and conveys attitudes values and perspectives. They explore the representations of ideas in art as artists and curators through developing an informed response to art works and exhibitions they have seen and experienced. Students apply technical and curatorial skills to create their own works and exhibitions.

Specific Unit Goals

This unit should enable students to:

A	T	M
<ul style="list-style-type: none"> analyse stylistic and curatorial choices and how that positions audiences and conveys attitudes values and perspectives understand how technical and curatorial choices communicate meaning and purpose apply new technical skills to the creative process of curating works for exhibition conduct Creative Inquiry into curation and exhibition style and purpose considering impact on the audience 	<ul style="list-style-type: none"> critically analyse stylistic and curatorial choices and how that positions audiences and conveys attitudes values and perspectives understand how technical and curatorial choices communicate meaning and purpose apply new technical skills to the creative process of curating works for exhibition conduct Creative Inquiry into curation and exhibition style and purpose considering impact on the audience 	<ul style="list-style-type: none"> describe stylistic and curatorial choices describe examples of how technical and curatorial choices communicate meaning use skills to curate works for an exhibition explore examples of curation and exhibition style

Content Descriptions

Interdisciplinary Inquiry in Visual Arts**Value: 1.0****Interdisciplinary Inquiry in Visual Arts a****Value 0.5****Interdisciplinary Inquiry in Visual Arts b****Value 0.5****Unit Description**

Interdisciplinary inquiry is an approach to studying and addressing complex problems or issues to explore new perspectives and advance critical thinking. Students develop skills in synthesising viewpoints, drawing conclusions, and exploring alternative applications of art practice. Students learn about how Visual Art can be used to learn about and communicate a wide range of concepts often considered the domain of other disciplines. They explore techniques for understanding, representing knowledge and concepts from other disciplines. Students apply Visual Art as a way of knowing the world and sharing their insights.

Specific Unit Goals

This unit should enable students to:

A	T	M
<ul style="list-style-type: none"> analyse interdisciplinary Visual Arts practices assess the interdisciplinary inquiry process in Visual Art apply interdisciplinary approaches to the creative process conduct interdisciplinary Creative Inquiry into complex issues raised by a range of disciplines 	<ul style="list-style-type: none"> critically analyse interdisciplinary Visual Arts practices evaluate the interdisciplinary inquiry process in Visual Art apply interdisciplinary approaches to the creative process conduct interdisciplinary Creative Inquiry into complex issues raised by a range of disciplines 	<ul style="list-style-type: none"> explain interdisciplinary Visual Arts practices use interdisciplinary approaches to the creative process explore examples of interdisciplinary artworks to inform own practice

Content Descriptions

A guide to reading and implementing content descriptions

Content descriptions specify the knowledge, understanding and skills that students are expected to learn and that teachers are expected to teach. Teachers are required to develop a program of learning that allows students to demonstrate all the content descriptions. The lens which the teacher uses to demonstrate the content descriptions may be either guided through provision of electives within each unit or determined by the teacher when developing their program of learning.

A program of learning is what a college provides to implement the course for a subject. It is at the discretion of the teacher to emphasis some content descriptions over others. The teacher may teach additional (not listed) content provided it meets the specific unit goals. This will be informed by the student needs and interests.

Assessment

Refer to pages 9-11.

Independent Study

Value: 1.0

Independent Study a

Value 0.5

Independent Study b

Value 0.5

Prerequisites

Independent Study units are only available to individual students in Year 12. A student can only study a maximum of one Independent Study unit in each course. Students must have studied at least three standard 1.0 units from this course. An Independent Study unit requires the principal's written approval. Principal approval can also be sought by a student in Year 12 to enrol concurrently in an Independent Study unit and their third 1.0 unit in this course of study.

Unit Description

An Independent Study unit has an important place in senior secondary courses. It is a valuable pedagogical approach that empowers students to make decisions about their own learning. An Independent Study unit can be proposed by an individual student for their own independent study and negotiated with their teacher. The program of learning for an Independent Study unit must meet the unit goals and content descriptions as they appear in the course.

Specific Unit Goals

This unit should enable students to:

A	T	M
<ul style="list-style-type: none"> analyse art works in the chosen area of study demonstrate how concepts and ideas in the chosen area of study can be represented in art works create a body of artwork related to the area of study for a specific audience apply a variety of artistic techniques to achieve a purpose in the related area of study 	<ul style="list-style-type: none"> critically analyse art works in the chosen area of study demonstrate how concepts and ideas in the chosen area of study can be represented in art works create a body of artwork related to the area of study for a specific audience apply a variety of artistic techniques to achieve a purpose in the related area of study 	<ul style="list-style-type: none"> explain art works in the chosen area of study create a body of artwork related to the area of study for a specific audience use a variety of artistic techniques to explore ideas

Content Descriptions

All knowledge, understanding and skills below must be delivered:

A	T	M
Concepts and Theories		
<ul style="list-style-type: none"> analyse a variety of art works that relate to the chosen area of study analyse a range of theories and approaches in the chosen area of study 	<ul style="list-style-type: none"> evaluate a variety of art works that relate to the chosen area of study critically analyse a range of theories and approaches in the chosen area of study 	<ul style="list-style-type: none"> explain a variety of art works that relate to the chosen area of study

A	T	M
<ul style="list-style-type: none"> analyse how concepts, themes and/or perspectives are represented in the chosen area of study 	<ul style="list-style-type: none"> critically analyse how concepts, themes and/or perspectives are represented in the chosen area of study 	<ul style="list-style-type: none"> describe how themes are represented in the chosen area of study
Contexts		
<ul style="list-style-type: none"> analyse how social, historical, political and/or cultural contexts have impacted artworks within the chosen area of study 	<ul style="list-style-type: none"> critically analyse how social, historical, political and/or cultural contexts have impacted artworks within the chosen area of study critically analyse the effect of context on audience and critical reception of works 	<ul style="list-style-type: none"> identify social, historical, political and/or cultural contexts within the chosen area of study
Creative Process		
<ul style="list-style-type: none"> analyse concepts, themes and/or perspectives in art works relating to the chosen area of study, applying the creative process to develop a variety of responses create a body of artworks by combining ideas, exploring approaches, techniques and strategies, problem solving, revising, and refining demonstrate insights through artworks to express understanding of the chosen area of study to achieve a specific purpose for an intended audience 	<ul style="list-style-type: none"> critically analyse concepts, themes and/or perspectives in artworks relating to the chosen area of study, applying the creative process to develop a variety of responses create a body of artworks by synthesising ideas, exploring approaches, techniques and strategies, problem solving, revising, and refining demonstrate insights through artworks to express understanding of the chosen area of study to achieve a specific purpose for an intended audience 	<ul style="list-style-type: none"> explain ideas in art works relating to the chosen area of study create a body of artworks by using ideas, forms, and styles related to the chosen area of study
Communication and Technical Skills		
<ul style="list-style-type: none"> analyse technical choices, critical feedback, and self-reflection to refine communication to selected audiences in the chosen area of study analyse conventions, forms, and styles and make choices to enhance creative goals and intended messages in the chosen area of study 	<ul style="list-style-type: none"> evaluate technical choices, critical feedback, and self-reflection to refine communication to selected audiences in the chosen area of study evaluate conventions, forms, and styles and make choices to enhance creative goals and intended messages in the chosen area of study 	<ul style="list-style-type: none"> identify technical choices to communicate to an audience in the chosen area of study describe conventions to enhance creative goals in the chosen area of study

A	T	M
<ul style="list-style-type: none"> combine creative goals, technical skills, and conceptual development to enhance art practice in the chosen area of study create artworks using processes, conventions, familiar and unfamiliar technical skills in the chosen area of study analyse ideas using coherent arguments in a range of modes, incorporating metalanguage and academic integrity apply ethical standards, and work, health and safety practices to classwork, experimentation, and final works apply professional work practice such as, meeting deadlines, documenting work accurately, storing and handling work appropriately 	<ul style="list-style-type: none"> synthesise creative goals, technical skills, and conceptual development to enhance art practice in the chosen area of study create artworks using processes, conventions, familiar and unfamiliar technical skills in the chosen area of study synthesise complex ideas and coherent and sustained arguments in a range of modes, incorporating metalanguage and academic integrity apply ethical standards, and work, health and safety practices to classwork, experimentation, and final works apply professional work practice such as, meeting deadlines, documenting work accurately, storing and handling work appropriately 	<ul style="list-style-type: none"> create artworks using familiar and/or unfamiliar technical styles in the chosen area of study describe ideas and use academic integrity apply work, health and safety practices to classwork, experimentation, and final works understand work practice such as, meeting deadlines, documenting work accurately, storing and handling work appropriately
Reflection		
<ul style="list-style-type: none"> reflect on own learning style and use of appropriate techniques and strategies, including planning and time management, to improve learning outcomes 	<ul style="list-style-type: none"> reflect on own learning style and use of appropriate techniques and strategies, including planning and time management, to improve learning outcomes 	<ul style="list-style-type: none"> reflect on art practice, and learning, including time management, to improve outcomes

A guide to reading and implementing content descriptions

Content descriptions specify the knowledge, understanding and skills that students are expected to learn and that teachers are expected to teach. Teachers are required to develop a program of learning that allows students to demonstrate all the content descriptions. The lens which the teacher uses to demonstrate the content descriptions may be either guided through provision of electives within each unit or determined by the teacher when developing their program of learning.

A program of learning is what a college provides to implement the course for a subject. It is at the discretion of the teacher to emphasis some content descriptions over others. The teacher may teach additional (not listed) content provided it meets the specific unit goals. This will be informed by the student needs and interests.

Assessment

Refer to pages 9-11.

Appendix A – Implementation Guidelines

Available course patterns

A standard 1.0 value unit is delivered over at least 55 hours. To be awarded a course, students must complete at least the minimum units over the whole minor or major.

Course	Number of standard units to meet course requirements
Minor	Minimum of 2 units
Major	Minimum of 3.5 units

Units in this course can be delivered in any order.

Prerequisites for the course or units within the course

Students must have studied at least three standard 1.0 units from this course in order to access the Independent Study unit. An Independent Study unit requires the principal's written approval. Principal approval can also be sought by a student in Year 12 to enrol concurrently in an Independent Study unit and their third 1.0 unit in this course of study.

Arrangements for students continuing study in this course

Students who studied the previous course may undertake any units in this course provided there is no duplication of content.

Duplication of Content Rules

Students cannot be given credit towards the requirements for a Senior Secondary Certificate for a unit that significantly duplicates content in a unit studied in another course. The responsibility for preventing undesirable overlap of content studied by a student rests with the principal and the teacher delivering the course. Students will only be given credit for covering the content once.

Relationship to other courses

Students may complete units of study selected from both *Visual Arts* and *Specialised Visual Arts* to form a *Studies of Visual Arts* Minor, Major or Double Major.

Guidelines for Delivery

Program of Learning

A program of learning is what a school provides to implement the course for a subject. This meets the requirements for context, scope and sequence set out in the Board endorsed course. Students follow programs of learning in a college as part of their senior secondary studies. The detail, design, and layout of a program of learning are a college decision.

The program of learning must be documented to show the planned learning activities and experiences that meet the needs of particular groups of students, taking into consideration their interests, prior knowledge, abilities, and backgrounds. The program of learning is a record of the learning experiences that enable students to achieve the knowledge, understanding and skills of the content descriptions. There is no requirement to submit a program of learning to the OBSSS for approval. The principal will need to sign off at the end of Year 12 that courses have been delivered as accredited.

Content Descriptions

Are all content descriptions of equal importance? No. It depends on the focus of study. Teachers can customise their program of learning to meet their own students' needs, adding additional content descriptions if desired or emphasising some over others. A teacher must balance student needs with their responsibility to teach all content descriptions. It is mandatory that teachers address all content descriptions and that students engage with all content descriptions.

Half standard 0.5 units

Half standard units appear on the course adoption form but are not explicitly documented in courses. It is at the discretion of the college principal to split a standard 1.0 unit into two half standard 0.5 units. Colleges are required to adopt the half standard 0.5 units. However, colleges are not required to submit explicit documentation outlining their half standard 0.5 units to the BSSS. Colleges must assess students using the half standard 0.5 assessment task weightings outlined in the framework. It is the responsibility of the college principal to ensure that all content is delivered in units approved by the Board.

Moderation

Moderation is a system designed and implemented to:

- provide comparability in the system of school-based assessment
- form the basis for valid and reliable assessment in senior secondary schools
- involve the ACT Board of Senior Secondary Studies and colleges in cooperation and partnership
- maintain the quality of school-based assessment and the credibility, validity, and acceptability of Board certificates.

Moderation commences within individual colleges. Teachers develop assessment programs and instruments, apply assessment criteria, and allocate Unit Grades, according to the relevant Framework. Teachers within course teaching groups conduct consensus discussions to moderate marking or grading of individual assessment instruments and unit grade decisions.

The Moderation Model

Moderation within the ACT encompasses structured, consensus-based peer review of Unit Grades for all accredited courses over two Moderation Days. In addition to Moderation Days, there is statistical moderation of course scores, including small group procedures, for T courses.

Moderation by Structured, Consensus-based Peer Review

Consensus-based peer review involves the review of student work against system wide criteria and standards and the validation of Unit Grades. This is done by matching student performance with the criteria and standards outlined in the Achievement Standards, as stated in the Framework. Advice is then given to colleges to assist teachers with, or confirm, their judgments. In addition, feedback is given on the construction of assessment instruments.

Preparation for Structured, Consensus-based Peer Review

Each year, teachers of Year 11 are asked to retain originals or copies of student work completed in Semester 2. Similarly, teachers of a Year 12 class should retain originals or copies of student work completed in Semester 1. Assessment and other documentation required by the Office of the Board of Senior Secondary Studies should also be kept. Year 11 work from Semester 2 of the previous year is presented for review at Moderation Day 1 in March, and Year 12 work from Semester 1 is presented for review at Moderation Day 2 in August.

In the lead up to Moderation Day, a College Course Presentation (comprised of a document folder and a set of student portfolios) is prepared for each A, T and M course/units offered by the school and is sent into the Office of the Board of Senior Secondary Studies.

The College Course Presentation

The package of materials (College Course Presentation) presented by a college for review on Moderation Days in each course area will comprise the following:

- a folder containing supporting documentation as requested by the Office of the Board through memoranda to colleges, including marking schemes and rubrics for each assessment item
- a set of student portfolios containing marked and/or graded written and non-written assessment responses and completed criteria and standards feedback forms. Evidence of all assessment responses on which the Unit Grade decision has been made is to be included in the student review portfolios.

Specific requirements for subject areas and types of evidence to be presented for each Moderation Day will be outlined by the Board Secretariat through the *Requirements for Moderation Memoranda* and Information Papers.

Visual evidence for judgements made about practical performances

It is a requirement that schools' judgements of standards to practical performances (A/T/M) be supported by visual evidence (still photos or video).

The photographic evidence submitted must be drawn from practical skills performed as part of the assessment process.

Teachers should consult the BSSS website for current information regarding all moderation requirements including subject specific and photographic evidence.

Appendix B – Course Developers

Name	College
Associate Professor Alison Alder	Australian National University
Associate Professor Judith Dinham	Curtin University
Professor Denise Ferris	Australian National University
Associate Professor Katrina Sluis	Australian National University
Meredith Barnes	St Clare's College
Andrew Jones	Orana Steiner School
Jacqui Ockwell	Narrabundah College/Radford College

Appendix C – Common Curriculum Elements

Common curriculum elements assist in the development of high-quality assessment tasks by encouraging breadth and depth and discrimination in levels of achievement.

Organisers	Elements	Examples
create, compose, and apply	apply	ideas and procedures in unfamiliar situations, content, and processes in non-routine settings
	compose	oral, written, and multimodal texts, music, visual images, responses to complex topics, new outcomes
	represent	images, symbols, or signs
	create	creative thinking to identify areas for change, growth, and innovation, recognise opportunities, experiment to achieve innovative solutions, construct objects, imagine alternatives
	manipulate	images, text, data, points of view
analyse, synthesise, and evaluate	justify	arguments, points of view, phenomena, choices
	hypothesise	statement/theory that can be tested by data
	extrapolate	trends, cause/effect, impact of a decision
	predict	data, trends, inferences
	evaluate	text, images, points of view, solutions, phenomenon, graphics
	test	validity of assumptions, ideas, procedures, strategies
	argue	trends, cause/effect, strengths, and weaknesses
	reflect	on strengths and weaknesses
	synthesise	data and knowledge, points of view from several sources
	analyse	text, images, graphs, data, points of view
	examine	data, visual images, arguments, points of view
investigate	issues, problems	
organise, sequence, and explain	sequence	text, data, relationships, arguments, patterns
	visualise	trends, futures, patterns, cause, and effect
	compare/contrast	data, visual images, arguments, points of view
	discuss	issues, data, relationships, choices/options
	interpret	symbols, text, images, graphs
	explain	explicit/implicit assumptions, bias, themes/arguments, cause/effect, strengths/weaknesses
	translate	data, visual images, arguments, points of view
	assess	probabilities, choices/options
identify, summarise, and plan	select	main points, words, ideas in text
	reproduce	information, data, words, images, graphics
	respond	data, visual images, arguments, points of view
	relate	events, processes, situations
	demonstrate	probabilities, choices/options
	describe	data, visual images, arguments, points of view
	plan	strategies, ideas in text, arguments
	classify	information, data, words, images
	identify	spatial relationships, patterns, interrelationships
summarise	main points, words, ideas in text, review, draft and edit	

Appendix D – Glossary of Verbs

Verbs	Definition
Analyse	Consider in detail for the purpose of finding meaning or relationships, and identifying patterns, similarities, and differences
Apply	Use, utilise or employ in a particular situation
Argue	Give reasons for or against something
Assess	Make a Judgement about the value of
Classify	Arrange into named categories in order to sort, group or identify
Compare	Estimate, measure or note how things are similar or dissimilar
Compose	The activity that occurs when students produce written, spoken, or visual texts
Contrast	Compare in such a way as to emphasise differences
Create	Bring into existence, to originate
Critically analyse	Analysis that engages with criticism and existing debate on the issue
Demonstrate	Give a practical exhibition an explanation
Describe	Give an account of characteristics or features
Discuss	Talk or write about a topic, taking into consideration different issues or ideas
Evaluate	Examine and judge the merit or significance of something
Examine	Determine the nature or condition of
Explain	Provide additional information that demonstrates understanding of reasoning and /or application
Extrapolate	Infer from what is known
Hypothesise	Put forward a supposition or conjecture to account for certain facts and used as a basis for further investigation by which it may be proved or disproved
Identify	Recognise and name
Interpret	Draw meaning from
Investigate	Planning, inquiry into and drawing conclusions about
Justify	Show how argument or conclusion is right or reasonable
Manipulate	Adapt or change
Plan	Strategize, develop a series of steps, processes
Predict	Suggest what might happen in the future or as a consequence of something
Reflect	The thought process by which students develop an understanding and appreciation of their own learning. This process draws on both cognitive and affective experience
Relate	Tell or report about happenings, events, or circumstances
Represent	Use words, images, symbols, or signs to convey meaning
Reproduce	Copy or make close imitation
Respond	React to a person or text
Select	Choose in preference to another or others
Sequence	Arrange in order
Summarise	Give a brief statement of the main points
Synthesise	Combine elements (information/ideas/components) into a coherent whole
Test	Examine qualities or abilities
Translate	Express in another language or form, or in simpler terms
Visualise	The ability to decode, interpret, create, question, challenge and evaluate texts that communicate with visual images as well as, or rather than, words

Appendix E – Glossary for ACT Senior Secondary Curriculum

Courses will detail what teachers are expected to teach and students are expected to learn for Years 11 and 12. They will describe the knowledge, understanding and skills that students will be expected to develop for each learning area across the years of schooling.

Learning areas are broad areas of the curriculum, including English, mathematics, science, the arts, languages, health, and physical education.

A **subject** is a discrete area of study that is part of a learning area. There may be one or more subjects in a single learning area.

Frameworks are system documents for Years 11 and 12 which provide the basis for the development and accreditation of any course within a designated learning area. In addition, frameworks provide a common basis for assessment, moderation and reporting of student outcomes in courses based on the framework.

The **course** sets out the requirements for the implementation of a subject. Key elements of a course include the rationale, goals, content descriptions, assessment, and achievement standards as designated by the framework.

BSSS courses will be organised into units. A unit is a distinct focus of study within a course. A standard 1.0 unit is delivered for a minimum of 55 hours generally over one semester.

Core units are foundational units that provide students with the breadth of the subject.

Additional units are avenues of learning that cannot be provided for within the four core 1.0 standard units by an adjustment to the program of learning.

An **independent study unit** is a pedagogical approach that empowers students to make decisions about their own learning. Independent study units can be proposed by a student and negotiated with their teacher but must meet the specific unit goals and content descriptions as they appear in the course.

An **elective** is a lens for demonstrating the content descriptions within a standard 1.0 or half standard 0.5 unit.

A **lens** is a particular focus or viewpoint within a broader study.

Content descriptions refer to the subject-based knowledge, understanding and skills to be taught and learned.

A **program of learning** is what a college develops to implement the course for a subject and to ensure that the content descriptions are taught and learned.

Achievement standards provide an indication of typical performance at five different levels (corresponding to grades A to E) following completion of study of senior secondary course content for units in a subject.

ACT senior secondary system **curriculum** comprises all BSSS approved courses of study.

Appendix F – Course Adoption

Conditions of Adoption

The course and units of this course are consistent with the philosophy and goals of the college and the adopting college has the human and physical resources to implement the course.

Adoption Process

Course adoption must be initiated electronically by an email from the principal or their nominated delegate to bssscertification@ed.act.edu.au. A nominated delegate must CC the principal.

The email will include the **Conditions of Adoption** statement above, and the table below adding the **College** name, and circling the **Classification/s** required.

College:	
Course Title:	Specialised Visual Arts
Classification/s:	A T M
Accredited from:	2022
Framework:	The Arts Framework 2021
