The ACT Senior Secondary System

The ACT senior secondary system recognises a range of university, vocational or life skills pathways.

The system is based on the premise that teachers are experts in their area: they know their students and community and are thus best placed to develop curriculum and assess students according to their needs and interests. Students have ownership of their learning and are respected as young adults who have a voice.

A defining feature of the system is school-based curriculum and continuous assessment. School-based curriculum provides flexibility for teachers to address students' needs and interests. College teachers have an opportunity to develop courses for implementation across ACT schools. Based on the courses that have been accredited by the BSSS, college teachers are responsible for developing programs of learning. A program of learning is developed by individual colleges to implement the courses and units they are delivering.

Teachers must deliver all content descriptions; however, they do have flexibility to emphasise some content descriptions over others. It is at the discretion of the teacher to select the texts or materials to demonstrate the content descriptions. Teachers can choose to deliver course units in any order and teach additional (not listed) content provided it meets the specific unit goals.

School-based continuous assessment means that students are continually assessed throughout years 11 and 12, with both years contributing equally to senior secondary certification. Teachers and students are positioned to have ownership of senior secondary assessment. The system allows teachers to learn from each other and to refine their judgement and develop expertise.

Senior secondary teachers have the flexibility to assess students in a variety of ways. For example: multimedia presentation, inquiry-based project, test, essay, performance and/or practical demonstration may all have their place. College teachers are responsible for developing assessment instruments with task specific rubrics and providing feedback to students.

The integrity of the ACT Senior Secondary Certificate is upheld by a robust, collaborative, and rigorous structured consensus-based peer reviewed moderation process. System moderation involves all year 11 and 12 teachers from public, non-government and international colleges delivering the ACT Senior Secondary Certificate.

Only students who desire a pathway to university are required to sit a general aptitude test, referred to as the ACT Scaling Test (AST), which moderates student scores across courses and colleges. Students are required to use critical and creative thinking skills across a range of disciplines to solve problems. They are also required to interpret a stimulus and write an extended response.

Senior secondary curriculum makes provision for student-centred teaching approaches, integrated and project-based learning inquiry, formative assessment, and teacher autonomy. ACT Senior Secondary Curriculum makes provision for diverse learners and students with mild to moderate intellectual disabilities, so that all students can achieve an ACT Senior Secondary Certificate.

The ACT Board of Senior Secondary Studies (BSSS) leads senior secondary education. It is responsible for quality assurance in senior secondary curriculum, assessment, and certification. The Board consists of nominees from colleges, professional bodies, universities, industry, parent/carer organisations and unions. The Office of the Board of Senior Secondary Studies (OBSSS) consists of professional and administrative staff who support the Board in achieving its objectives and functions.

ACT Senior Secondary Certificate

Courses of study for the ACT Senior Secondary Certificate:

- provide a variety of pathways, to meet different learning needs and encourage students to complete their secondary education
- enable students to develop the essential capabilities for twenty-first century learners
- empower students as active participants in their own learning
- engage students in contemporary issues relevant to their lives
- foster students' intellectual, social, and ethical development
- nurture students' wellbeing, and physical and spiritual development
- enable effective and respectful participation in a diverse society.

Each course of study:

- comprises an integrated and interconnected set of knowledge, skills, ~~behaviours, and behaviours,~~ and dispositions that students develop and use in their learning across the curriculum
- is based on a model of learning that integrates intended student outcomes, pedagogy, and assessment
- outlines teaching strategies which are grounded in learning principles and encompass quality teaching
- promotes intellectual quality, establishes a rich learning environment, and generates relevant connections between learning and life experiences
- provides formal assessment and certification of students' achievements.

Underpinning beliefs

- All students are able to learn.
- Learning is a partnership between students and teachers.
- Teachers are responsible for advancing student learning.

Learning Principles

1. Learning builds on existing knowledge, understandings and skills.
(Prior knowledge)
2. When learning is organised around major concepts, principles and significant real world issues, within and across disciplines, it helps students make connections and build knowledge structures.
(Deep knowledge and connectedness)
3. Learning is facilitated when students actively monitor their own learning and consciously develop ways of organising and applying knowledge within and across contexts.
(Metacognition)
4. Learners' sense of self and motivation to learn affects learning.
(Self-concept)
5. Learning needs to take place in a context of high expectations.
(High expectations)
6. Learners learn in different ways and at different rates.
(Individual differences)
7. Different cultural environments, including the use of language, shape learners' understandings and the way they learn.
(Socio-cultural effects)
8. Learning is a social and collaborative function as well as an individual one.
(Collaborative learning)
9. Learning is strengthened when learning outcomes and criteria for judging learning are made explicit and when students receive frequent feedback on their progress.
(Explicit expectations and feedback)

General Capabilities

All courses of study for the ACT Senior Secondary Certificate should enable students to develop essential capabilities for twenty-first century learners. These ‘capabilities’ comprise an integrated and interconnected set of knowledge, skills, behaviours, and dispositions that students develop and use in their learning across the curriculum.

The capabilities include:

- literacy
- numeracy
- information and communication technology (ICT)
- critical and creative thinking
- personal and social
- ethical understanding
- intercultural understanding

Courses of study for the ACT Senior Secondary Certificate should be both relevant to the lives of students and incorporate the contemporary issues they face. Hence, courses address the following three priorities. These priorities are:

- Aboriginal and Torres Strait Islander histories and cultures
- Asia and Australia’s engagement with Asia
- Sustainability

Elaboration of these General Capabilities and priorities is available on the ACARA website at www.australiancurriculum.edu.au.

Literacy

Learning a language develops overall literacy, strengthening literacy-related capabilities that are transferable across languages, as well as the knowledge and skills necessary to comprehend text in the target language. The fundamental metalanguage and understanding of language allow for new insight into existing language and literacy in all the student’s languages. As such, explicit, explanatory, and exploratory talk around language and literacy is a core element of language learning. Learners are supported to develop their own meta-awareness, to be able to think and talk about how the language works and about how they learn to use it.

Numeracy

Learning languages affords opportunities for learners to express numerical understanding in another language, reinforcing numerical understanding in the primary language/s. Students will be presented with texts that contain numerical information for critical interpretation and understanding. This builds their capacity to conceptualise and understand important texts about the world around them. The pattern recognition and application practices in language learning support the learning of Mathematics which uses similar sorts of algebraic reasoning and is in many ways, its own language.

Digital Literacy

Learning languages involves using digital environments and technologies in the target language. Students will learn how to use digital technologies appropriately to enhance learning and communication, and to ensure that they do not undermine their own progress with unnecessary recourse to AI and other translation tools. Accessing live target language environments and texts via digital media contributes to the development of linguistic and cultural knowledge and extends the boundaries of the classroom. Students will access contemporary expression through immediate connection to the target culture and thus leading to an up to date understanding of language and culture. Accessing online contexts, also allows time for students to have more developed information literacy skills and identify reliable online sources in the target language.

Critical and Creative Thinking

In learning a language, students interact with people and ideas from diverse backgrounds and perspectives across a wide range of topics, which provides opportunities for critical thinking, reflection and encourages creative, divergent and imaginative thinking. By learning to notice, connect, compare, and analyse aspects of the target language, students develop critical, analytic and problem-solving skills. In creating texts, they learn to apply creative processes to express their ideas and insights.

Personal and Social Capabilities

Interacting effectively in an additional language and with people of diverse language backgrounds involves negotiating, interpreting and reflecting on meaning in a range of personal, social and cultural situations. This involves understanding, empathising and reflexivity; important elements of personal and social capabilities, as they reflect on the world around them and their place in it. Being open minded and recognising that people view and experience the world in different ways and learning to interact in a collaborative and respectful manner within their own and other cultures and languages are key elements of personal and social competence.

Ethical Understanding

When learning another language, students are taught explicitly to acknowledge and consider difference in their interactions with others and to develop respect for diverse ways of perceiving and acting in the world. In developing a reflexive approach to language learning, they develop and clarify their own beliefs in interacting with those of others. Students will develop and extend their understanding of ethical practices in translation, scholarship and research.

Intercultural Understanding

The development of intercultural understanding is a central aim of learning languages, as it is integral to global citizenship and lifelong learning. Students bring various preconceptions, assumptions, and orientations shaped by their existing language(s) culture(s) to their learning that can be challenged by the new language experience. Learning to move between the existing and new languages and cultures is integral to language learning and is the key to the development of students' intercultural capability. By learning a new language or learning to use an existing language in new domains and contexts, students are able to notice, compare, and reflect on things previously taken for granted; to explore their own linguistic, social and cultural practices as well as those associated with the target language. They begin to see the complexity, variability, and sometimes the contradictions involved in using language. Learning a new language does not require forsaking the first language. It is an enriching and cumulative process, which broadens the learner's communicative repertoire, providing additional resources for interpreting and making meaning. Learners come to realise that interactions between different people via different languages also involves interactions between the different kinds of knowledge, understanding, and values that are articulated through language(s) and culture(s). They realise that successful intercultural communication is not only determined by what they do or say but also by what members of the other language and culture understand from what they say or do.

Cross-Curriculum Priorities

Aboriginal and Torres Strait Islander Histories and Cultures

Learning a language provides opportunities for students to engage with Aboriginal and Torres Strait Islander Histories and Cultures by exploring the connections between language, culture, and identity. Students analyse how ways of knowing, values, and perspectives are shaped and communicated within cultures, supporting a deeper understanding and appreciation of Aboriginal and Torres Strait Islander histories, cultures, deep knowledge traditions, and holistic worldviews.

Students draw on their knowledge of Aboriginal and Torres Strait Islander Peoples and Cultures to make intercultural comparisons with the languages and cultures they are studying. They examine how relationships to place, community, and cultural knowledge are expressed and sustained through storytelling, traditions, and social practices, developing an understanding of cultural continuity, diversity, and the ways cultures maintain identity over time.

Asia and Australia's Engagement with Asia

The study of languages supports students' understanding of the diversity within and between the countries of the Asia region and Australia's connections with the region. Students explore how language reflects cultural practices, social relationships, and ways of thinking within Asian societies. This develops awareness of the cultures, histories, and contributions of the peoples of Asia, as well as the social, cultural, and economic links that connect Australia with the Asia region.

Students strengthen their understanding of Australia's engagement with Asia through intercultural comparison. In studying an Asian language, students engage directly with Asian perspectives and modes of communication; in studying another language, students draw on shared learning to develop Asia literacy. This learning supports the development of skills and dispositions for effective communication and engagement with the peoples of Asia so they can effectively live, work and learn in the region.

Sustainability

Students engage with the sustainability priority by developing an understanding of the interconnected nature of environmental, social, cultural, and economic systems. They explore how different societies value and respond to environmental and social challenges and reflect on how current actions shape future wellbeing.

Through engagement with relevant texts and contexts, students investigate key sustainability concepts such as conservation, community responsibility, and social change. They examine how cultural values and worldviews influence perspectives on sustainability, and how language is used to share knowledge, communicate ideas, and respond to change across cultures. By comparing and reflecting on diverse perspectives, students build the skills to communicate responsibly and collaborate effectively. This supports informed participation in local, regional, and global communities and encourages more sustainable ways of living.

Students also deepen their understanding of sustainability within specific cultural contexts, particularly in relation to global challenges such as climate change, food security, and land management. Through respectful interaction, negotiation of meaning, and reflection on communication, students develop the capabilities needed to live and work productively and sustainably.

Beginning Modern Languages

A - T - M

Rationale

Learning a language is a joyful and rewarding process that enables students to build connections and relationships locally and internationally, widen their horizons, sharpen and broaden cognitive and emotional capability, and enrich cultural experience and intercultural capabilities. They strengthen their capacity to deal with uncertainty and overcoming difficulty and error. Ultimately, they will be developing skills as collaborators and interlocutors in all their languages.

A new language opens up new perspectives for learners, not only in relation to other cultures and languages, but also in terms of their own language and cultural practices. Students develop an understanding of the nature of the target and their own languages' linguistic and stylistic features, of inherent cultural experiences, and of the processes of communication and mediation. As they create original texts and communicate meaning, they reflect upon their choices, actions and interactions. They engage with a wide range of content as they learn language. Students strengthen their communication skills and creative and critical thinking capabilities.

Students develop understanding of how an interlocutor's values and culture shape their world view, and how that interaction can reshape or consolidate their own. Learning languages extends the learner's understanding of themselves, their heritage, values, culture, and identity. Students develop intracultural and intercultural capability; they develop understanding of, and respect for, diversity and difference, and openness to different perspectives and experiences. Their understanding of themselves and their world is enlarged to encompass new knowledge and new ways of communicating, seeing, and organising perceptions.

Learning languages contributes to strengthening the community's economic potential, social harmony and community inclusion. Students learn to reorganise their thinking to accommodate the structure of another language and in doing so accommodate diversity and difference. They develop cognitive flexibility, problem-solving ability and resilience, which can be applied when problems and solutions are not evident, as well as when critical thinking and creative approaches are required. They grow in confidence and resilience as they take on and overcome the difficulties inherent to engaging with a new language.

Goals

This course should enable students to:

- become confident communicators who can use the target language effectively in a range of contexts and for a variety of purposes, developing interpersonal skills
- build intercultural capability by exploring the connections between experiencing language and culture, reflecting on self and others in the world, and the ways of the world, to foster respect, empathy, and local and global awareness
- apply increasingly complex linguistic concepts to both the target language and own language(s), developing accuracy, creativity, reflexivity¹, and adaptability in interpreting, creating and exchanging meaning

¹ See Appendix F

- use the target and own language(s) to gain and [mediate](#) knowledge, debate ideas, and share meanings, to enable engagement with others, collaboration, and problem-solving across cultures
- build the confidence to learn independently, experiment with the language, and reflect on experiences to develop the creativity, open-mindedness, reflective and reflexive practices, and resilience needed to be lifelong learners

Unit Titles

- The Individual
- Society and Community
- The Changing World
- Diverse Perspectives
- Independent Study

Organisation of Content

The Individual

Students learn about language and individual identity. They conceptualise how relationships and personal experiences shape identity in language communities. Students analyse how individuals express different aspects of their identity. They develop a repertoire of cultural knowledge and target language skills. Students reflect upon new linguistic practices, their own and others expression of identity, and relationships with others.

Society and Community

Students develop an understanding about living in societies and community. They express their understanding of how to participate in societies and communities through a repertoire of target language and use their developing cultural and intercultural capabilities. Students engage with how societies and communities use language to relate to each other and the wider world. They reflect on diverse cultural and linguistic practices and consider these in relation to their own.

The Changing World

Students explore personal, local and global change. They explore challenges and issues faced by target language communities. Students consider how values and culture/s shape understanding and communication about issues that impact our world. They develop a repertoire of target language and cultural capabilities to interact with others around the issues and build and share understanding. Students reflect on diverse cultural and linguistic practices for addressing personal, local and global.

Diverse Perspectives

Students learn about how diverse perspectives are expressed. They appreciate how cultural expression, perspectives and behaviours are sustained and transformed. Students apply a developing repertoire of target language, and cultural and intercultural capabilities to express views and perspectives. They reflect on their own perspectives, beliefs and cultural practices.

Independent Study

An Independent Study unit has an important place in senior secondary courses. It is a valuable pedagogical approach that empowers students to make decisions about their own learning. An Independent Study unit can be proposed by an individual student for their own independent study and negotiated with their teacher. The program of learning for an Independent Study unit must meet the unit goals and content descriptions as they appear in the course.

Independent Study units are only available to individual students in Year 12. A student can only study a maximum of one Independent Study unit in each course. Students must have studied at least three standard 1.0 units from this course. An Independent Study unit requires the principal's written approval. Principal approval can also be sought by a student in Year 12 to enrol concurrently in an Independent Study unit and their third or fourth 1.0 unit in this course of study.

Assessment

The identification of criteria within the achievement standards and assessment task types and weightings provides a common and agreed basis for the collection of evidence of student achievement.

Assessment Criteria (the dimensions of quality that teachers look for in evaluating student work) provide a common and agreed basis for judgement of performance against unit and course goals, within and across colleges. Over a course, teachers must use all these criteria to assess students' performance but are not required to use all criteria on each task. Assessment criteria are to be used holistically on a given task and in determining the unit grade.

Assessment Tasks elicit responses that demonstrate the degree to which students have achieved the goals of a unit based on the assessment criteria. The Common Curriculum Elements (CCE) is a guide to developing assessment tasks that promote a range of thinking skills (see Appendix C). It is highly desirable that assessment tasks engage students in demonstrating higher order thinking.

Rubrics are constructed for individual tasks, informing the assessment criteria relevant for a particular task, and can be used to assess a continuum that indicates levels of student performance against each criterion.

Assessment Criteria

Students will be assessed on:

- Understanding Language and Culture
- Communicating Meaning in Language
- Reflection on Learning and Self in the World

Assessment Task Types

Language acquisition is cumulative. Deep learning and understanding, opportunities to develop understanding over time and authentic interaction are valued. Holistic assessment is encouraged to allow students to evidence understanding and communicate in authentic contexts.

The assessment suite for each unit must include tasks from each category. Tasks may combine categories.	
Understanding Language and Culture	Communicating Meaning in Language
<p><i>The stimulus material about unit concepts must be in the target language, but responses may be in English.</i></p> <p>This may include tasks such as:</p> <ul style="list-style-type: none"> • Comprehension task <ul style="list-style-type: none"> - Demonstrating understanding of meaning of a text via reading, listening or viewing, or multi-modal texts • Deconstructing texts, unseen or known • Idiomatic translation of extended text into language of instruction • Inquiry-Based Task, e.g. research task with in-class validation • Literary and stylistic analysis • Short Response stimulus task 	<p><i>Production about unit concepts must be in the target language.</i></p> <p>This may include tasks such as:</p> <ul style="list-style-type: none"> • Extended writing <ul style="list-style-type: none"> - Take home research-based essay - In-class response to an unseen stimulus - In-class prompt to write on a taught and prepared content • Interview – unseen or prepared stimulus with unseen questions • Inquiry-Based Task, e.g. research task with in-class validation • Prepared oral delivered to the class followed by unseen questions • Multi-modal text production e.g. short film, podcast, poster, vlog, social media simulation • Unknown roleplay scenario with a short preparation
Reflection on Learning and Self in the World	
<p><i>Stimulus and production may be in English or the target language as appropriate to level and task design.</i></p> <p>Reflection and reflexivity of self in the world, are a requirement described in the achievement standards, therefore they must be a component of the assessment suite. Reflection and Reflexivity can be imbedded in the communicating or understanding task, or separately. This may include:</p> <ul style="list-style-type: none"> • Annotations or a rationale for a task that reflects critical thinking, the cultural situatedness of ideas, people, language choices • A creative writing task with an explanation of choices • A reflexive question within a communication or understanding task that extends from the topic • A unit journal with prompts to generate reflexive thinking about formative work and evolving understand of perspectives, stance, positionality, reflection on the cultural construction of meanings, values, attitudes, dispositions • A written or spoken argument about their own work’s values and positionality • A written or spoken commentary on own changed views about the world as a result of the unit of work or task as the capstone to a task from the other two categories 	
Weightings Advice:	
No task is to be weighted less than 20% or more than 50% for a 1.0 unit.	

Additional Assessment Information

- For a standard unit (1.0), students must complete a minimum of three assessment tasks and a maximum of five to evidence learning.
- For a half standard unit (0.5), students must complete a minimum of two and a maximum of three assessment tasks to evidence learning and include the three task types.
- Teachers should consider a sequence of learning tasks across the unit to support learning and maximise evidence of understanding, communication and reflection, e.g. gradual release of responsibility; surface, deep, transfer.
- Teachers should balance the range of macro skills — reading, writing, speaking and listening/viewing — in their assessment across the course to ensure a broad array of skills and capabilities are developed.
- The complexity of the target language in the stimulus material and the response required should reflect the level of the course and point of progress within the course. Achievement Standards and Language specific guidance for semesters 1, 2, 3, and 4 in the courses is the point of reference for developing rubrics that reference language progression in relation to the descriptors in the Achievement Standards.
- Look for advice on task parameters in the language specific guidance in the course documents, which have been developed so tasks and rubrics reflect appropriate language progressions.
- Schools must ensure that tasks are designed to mitigate academic integrity risks.
- The use of a dictionary, generative AI or translation software is at the discretion of the school. The conditions of an assessment task must be specified for clarity to students and for moderation purposes.
- Teachers should consider designing tasks that allow them to meet the requirements of the *Retention of Student Assessment Evidence Policy*.

Achievement Standards

Years 11 and 12 Achievement Standards are written for A-T courses. A single Achievement Standard is written for M courses.

A Year 12 student in any unit is assessed using the Year 12 Achievement Standards. A Year 11 student in any unit is assessed using the Year 11 Achievement Standards. Year 12 Achievement Standards reflect higher expectations of student achievement compared to the Year 11 Achievement Standards. Years 11 and 12 Achievement Standards are differentiated by cognitive demand, the number of dimensions and the depth of inquiry.

An Achievement Standard cannot be used as a rubric for an individual assessment task. Assessment is the responsibility of the college. Student tasks may be assessed using rubrics or marking schemes devised by the college. A teacher may use the Achievement Standards to inform development of rubrics. The verbs used in Achievement Standards may be reflected in the rubric. In the context of combined Years 11 and 12 classes, it is best practice to have a distinct rubric for Years 11 and 12. These rubrics should be available for students prior to completion of an assessment task so that success criteria are clear.

The Individual

Value: 1.0

The Individual a

Value 0.5

The Individual b

Value 0.5

Unit Description

Students learn about language and individual identity. They conceptualise how relationships and personal experiences shape identity in language communities. Students analyse how individuals express different aspects of their identity. They develop a repertoire of cultural knowledge and target language skills. Students reflect upon new linguistic practices, their own and others expression of identity, and relationships with others.

Specific Unit Goals

This unit should enable students to:

A Course	T Course	M Course
<ul style="list-style-type: none"> analyse ideas about how relationships and personal experiences shape identity in language communities analyse how individuals use target language to express their identity and communicate their personal beliefs with each other apply a developing repertoire of cultural knowledge and target language skills around identity and relationships reflect on their developing repertoire of cultural knowledge and target language skills around their own and others' identities and relationships 	<ul style="list-style-type: none"> critically analyse ideas about how relationships and personal experiences shape identity in language communities evaluate how individuals use target language to express their identity and communicate their personal beliefs with each other apply a developing repertoire of cultural knowledge and target language skills around identity and relationships reflect on their developing repertoire of cultural knowledge and target language skills around their own and others' identities and relationships 	<ul style="list-style-type: none"> use language about individuality, identity or relationships to interact with others and explain topics explain experiences of individuality, identity or relationships in the content of target culture/s use a repertoire of cultural knowledge and target language around individuality, identity or relationships reflect on their own identity and language

A guide to reading and implementing content descriptions

Content descriptions specify the knowledge, understanding and skills that students are expected to learn and that teachers are expected to teach. Teachers are required to develop a program of learning that allows students to demonstrate all the content descriptions. The lens which the teacher uses to demonstrate the content descriptions may be either guided through provision of electives within each unit or determined by the teacher when developing their program of learning.

A program of learning is what a college provides to implement the course for a subject. It is at the discretion of the teacher to emphasise some content descriptions over others. The teacher may teach additional (not listed) content provided it meets the specific unit goals. This will be informed by the student needs and interests.

Society and Community

Value: 1.0

Society and Community a

Value 0.5

Society and Community b

Value 0.5

Unit Description

Students develop an understanding about living in societies and community. They express their understanding of how to participate in societies and communities through a repertoire of target language and use their developing cultural and intercultural capabilities. Students engage with how societies and communities use language to relate to each other and the wider world. They reflect on diverse cultural and linguistic practices and consider these in relation to their own.

Specific Unit Goals

This unit should enable students to:

A Course	T Course	M Course
<ul style="list-style-type: none"> analyse ideas about living and participating in societies and communities analyse how communities use language to relate to each other and the wider world apply a developing repertoire of cultural knowledge and target language skills to participate in societies and communities reflect on their developing repertoire of cultural knowledge and target language skills around diverse cultural and linguistic practices about living in a community 	<ul style="list-style-type: none"> critically analyse ideas about living and participating in societies and communities evaluate how communities use language to relate to each other and the wider world apply a developing repertoire of cultural knowledge and target language skills to participate in societies and communities reflect on their developing repertoire of cultural knowledge and target language skills around diverse cultural and linguistic practices about living in a community 	<ul style="list-style-type: none"> use language about living in societies and communities explain experiences of societies and communities in the content of target culture/s use a repertoire of cultural knowledge and target language around societies and communities reflect on living in communities

<ul style="list-style-type: none"> • apply grammar, familiar and unfamiliar vocabulary and idiomatic expressions to exchange analyses of ideas clearly, coherently and with impact about diverse perspectives on cultural expressions, and behaviours, e.g., presentation on food practices/ write recipes/ restaurant review, multiculturalism • apply the principles of academic integrity consistently and clearly to enhance audience confidence in ideas about cultural expression, perspectives, and behaviours, e.g., using reliable information sources in target language, referencing conventions in target language, using technology appropriately 	<ul style="list-style-type: none"> • apply complex grammar and familiar and unfamiliar vocabulary to exchange ideas or analyse situations about contemporary perspectives on traditions, thinking, behaviour and systems clearly and coherently, e.g., conjecture, descriptive language, preferences, language for emotions • apply the principles of academic integrity consistently and clearly to enhance audience confidence in ideas about cultural expression and behaviours, e.g., using reliable information sources in target language, referencing conventions in target language, using technology appropriately 	<ul style="list-style-type: none"> • use accurate language, vocabulary and grammar both orally and/or in writing about diverse perspectives • apply the principles of academic integrity consistently and clearly for ideas about diverse perspectives
Reflection on Learning and Self in the World		
<ul style="list-style-type: none"> • reflect on own language learning practices and applies feedback to propose appropriate, specific, personal improvements about diverse perspectives on traditions, practices and discussions, e.g., not perpetuating stereotypes and prejudices in own work • reflect insightfully on and others own cultural assumptions and perspectives about contemporary perspectives on traditions, practices and discussions, e.g., personal insights into cultural experiences, diverse perspectives and multiculturalism 	<ul style="list-style-type: none"> • reflect on own language learning practices and applies feedback to propose appropriate, specific, personal improvements, e.g., not perpetuating stereotypes and prejudices in own work • reflect genuinely and with insight on self and relationships between culture and language, e.g., personal insights into cultural experiences, diverse perspectives and multiculturalism 	<ul style="list-style-type: none"> • use effective learning skills • reflect on own learning and language acquisition skills about diverse perspectives

A guide to reading and implementing content descriptions

Content descriptions specify the knowledge, understanding and skills that students are expected to learn and that teachers are expected to teach. Teachers are required to develop a program of learning that allows students to demonstrate all the content descriptions. The lens which the teacher uses to demonstrate the content descriptions may be either guided through provision of electives within each unit or determined by the teacher when developing their program of learning.

A program of learning is what a college provides to implement the course for a subject. It is at the discretion of the teacher to emphasise some content descriptions over others. The teacher may teach additional (not listed) content provided it meets the specific unit goals. This will be informed by the student needs and interests.

Assessment

Refer to pages 10.

DRAFT

Independent Study

Value 1.0

Independent Study a

Value 0.5

Independent Study b

Value 0.5

Prerequisites

Independent Study units are only available to individual students in Year 12. A student can only study a maximum of one Independent Study unit in each course. Students must have studied at least three standard 1.0 units from this course. An Independent Study unit requires the principal's written approval. Principal approval can also be sought by a student in Year 12 to enrol concurrently in an Independent Study unit and their third or fourth 1.0 unit in this course of study.

Unit Description

An Independent Study unit has an important place in senior secondary courses. It is a valuable pedagogical approach that empowers students to make decisions about their own learning. An Independent Study unit can be proposed by an individual student for their own independent study and negotiated with their teacher. The program of learning for an Independent Study unit must meet the unit goals and content descriptions as they appear in the course.

Specific Unit Goals

This unit should enable students to:

A Course	T Course	M Course
<ul style="list-style-type: none"> analyse ideas and perspectives on the chosen topics analyse language uses and practices for engaging in dialogue about the chosen topics apply a developing repertoire of target language, and cultural and intercultural capabilities about the chosen topic reflect on their own beliefs and cultural practices on the chosen topic 	<ul style="list-style-type: none"> evaluate ideas and perspectives on the chosen topics evaluate language uses and practices for engaging in dialogue about the chosen topics apply an increasing repertoire of target language, and cultural and intercultural capabilities about the chosen topic reflect on their own beliefs and cultural practices on the chosen topic 	<ul style="list-style-type: none"> use language about the chosen topic explain the chosen topic in the content of target culture/s use a repertoire of cultural knowledge and target language around the chosen topic reflect on the chosen topic

Content Descriptions

All knowledge, understanding and skills below must be delivered:

A Course	T Course	M Course
Understanding Language and Culture		
<ul style="list-style-type: none"> analyse familiar and unfamiliar target language and/or script to decode and infer meaning and draw conclusions on the chosen topic apply developing intercultural understanding on the chosen topic to analyse the appropriateness of register and reasons for perspectives and/or behaviours with supporting evidence analyse concepts about the chosen topic and systems in texts with evidence for ideas 	<ul style="list-style-type: none"> critically analyse familiar and unfamiliar target language and/or script on the chosen topic to decode and infer meaning and draw logical conclusions apply emerging intercultural understanding about the chosen topic to evaluate the appropriateness of register and reasons for perspectives and/or behaviours with supporting evidence evaluate concepts about the chosen topic in texts with evidence for ideas 	<ul style="list-style-type: none"> explain texts about the chosen topic explain the chosen topic in the context of the target culture/s
Communicating Meaning in Language		
<ul style="list-style-type: none"> create coherent, accurate texts about the chosen topic for intended purpose, audience and context apply familiar and unfamiliar conventions of texts and culture to clarify understanding and mediate meaning on the chosen topic apply grammar, familiar and unfamiliar vocabulary and idiomatic expressions on the chosen topic to exchange analyses of ideas clearly, coherently and with impact apply the principles of academic integrity consistently and clearly to promote audience confidence in ideas communicated about the chosen topic, e.g., using 	<ul style="list-style-type: none"> create fluent, detailed texts about the chosen topic appropriate for purpose, audience and context apply familiar and unfamiliar conventions of texts and culture to enhance communication on the chosen topic apply complex grammar and familiar and unfamiliar vocabulary to exchange ideas or analyse situations on the chosen topic clearly and coherently apply the principles of academic integrity consistently and clearly to enhance audience confidence in ideas about the chosen topic, e.g., using reliable information sources 	<ul style="list-style-type: none"> apply literacy skills in target language to create and/or respond to texts about the chosen topic interacts in target language to explain the chosen topic use accurate language, vocabulary and grammar both orally and/or in writing about the chosen topic apply the principles of academic integrity consistently and clearly for ideas about the chosen topic

A Course	T Course	M Course
reliable information sources in target language, referencing conventions in target language, using technology appropriately	in target language, referencing conventions in target language, using technology appropriately	
Reflection on Learning and Self in the World		
<ul style="list-style-type: none"> reflect on own language learning practices and applies feedback to propose appropriate, specific, personal improvements about the chosen topic reflect analytically on and others own cultural assumptions and perspectives about the chosen topic 	<ul style="list-style-type: none"> reflect on own language learning practices and applies feedback to propose appropriate, specific, personal improvements reflect genuinely and with insight on self and relationships between culture and language 	<ul style="list-style-type: none"> use effective learning skills reflect on own learning and language acquisition skills about the chosen topic

A guide to reading and implementing content descriptions

Content descriptions specify the knowledge, understanding and skills that students are expected to learn and that teachers are expected to teach. Teachers are required to develop a program of learning that allows students to demonstrate all the content descriptions. The lens which the teacher uses to demonstrate the content descriptions may be either guided through provision of electives within each unit or determined by the teacher when developing their program of learning.

A program of learning is what a college provides to implement the course for a subject. It is at the discretion of the teacher to emphasise some content descriptions over others. The teacher may teach additional (not listed) content provided it meets the specific unit goals. This will be informed by the student needs and interests.

Assessment

Refer to pages 10.

Appendix A – Implementation Guidelines

Available course patterns

A standard 1.0 value unit is delivered over at least 55 hours. To be awarded a course, students must complete at least the minimum units over the whole minor, major, major/minor, or double major course.

Course	Number of standard units to meet course requirements
Minor	Minimum of 2 units
Major	Minimum of 3.5 units

Units in this course can be delivered in any order.

Prerequisites for the course or units within the course

To be eligible for the Beginning Modern Languages course, the school must use the Languages Eligibility Form and criteria to determine that the Beginning level of language is the most appropriate for the student. The Languages Eligibility Form is available on the BSSS website.

Students must have studied at least three standard 1.0 units from this course in order to access the Independent Study unit. An Independent Study unit requires the principal's written approval. Principal approval can also be sought by a student in Year 12 to enrol concurrently in an Independent Study unit and their third or fourth 1.0 unit in this course of study.

Arrangements for students continuing study in this course

Students who studied the previous course may undertake any units in this course provided there is no duplication of content.

Duplication of Content Rules

Students cannot be given credit towards the requirements for a Senior Secondary Certificate for a unit that significantly duplicates content in a unit studied in another course. The responsibility for preventing undesirable overlap of content studied by a student, rests with the principal and the teacher delivering the course. Students will only be given credit for covering the content once.

Guidelines for Delivery

Program of Learning

A program of learning is what a school provides to implement the course for a subject. This meets the requirements for context, scope and sequence set out in the Board endorsed course. Students follow programs of learning in a college as part of their senior secondary studies. The detail, design, and layout of a program of learning are a college decision.

The program of learning must be documented to show the planned learning activities and experiences that meet the needs of particular groups of students, taking into account their interests, prior knowledge, abilities, and backgrounds. The program of learning is a record of the learning experiences that enable students to achieve the knowledge, understanding and skills of the content descriptions. There is no requirement to submit a program of learning to the OBSSS for approval. The Principal will need to sign off at the end of Year 12 that courses have been delivered as accredited.

Content Descriptions

Are all content descriptions of equal importance? No. It depends on the focus of study. Teachers can customise their program of learning to meet their own students' needs, adding additional content descriptions if desired or emphasising some over others. A teacher must balance student needs with their responsibility to teach all content descriptions. It is mandatory that teachers address all content descriptions and that students engage with all content descriptions.

Half standard 0.5 units

Half standard units appear on the course adoption form but are not explicitly documented in courses. It is at the discretion of the college principal to split a standard 1.0 unit into two half standard 0.5 units. Colleges are required to adopt the half standard 0.5 units. However, colleges are not required to submit explicit documentation outlining their half standard 0.5 units to the BSSS. Colleges must assess students using the half standard 0.5 assessment task weightings outlined in the framework. It is the responsibility of the college principal to ensure that all content is delivered in units approved by the Board.

Moderation

System Moderation

System moderation begins in schools whereby teachers cooperate to develop assessment, and grade and score student assessment according to the relevant curriculum.

Moderation Day is an essential component of the ACT senior secondary system which empowers school autonomy in curriculum and assessment. Moderation Day is a collaborative and professional event whereby schools undertake system quality assurance activities on behalf of their current and future students. Moderation Day fosters and enriches the development of quality assessment and validates student achievement. Continued best practice in teaching and learning is ensured through the formation of valid, constructive, and detailed feedback.

System Moderation:

- provides comparability of school-based assessment
- forms the basis for valid and reliable assessment in senior secondary schools
- involves the ACT Board of Senior Secondary Studies (BSSS) and schools in cooperation and partnership
- maintains the integrity of the ACT Senior Secondary Certificate.

The Moderation Model

Moderation within the ACT senior secondary system encompasses structured, consensus-based peer review of Unit Grades and quality of assessment for all BSSS courses twice per year. In addition to System Moderation, there is statistical moderation of course scores.

Moderation by Structured, Consensus-based Peer Moderation

Consensus-based peer moderation involves the review of student assessment against system wide criteria and standards and the validation of Unit Grades. This is done by matching student performance with the Framework Achievement Standards. In addition, feedback will be provided on the quality of the task.

Preparation for Structured, Consensus-based Peer Review

Schools retain originals or copies of student assessment evidence completed in the delivery of the unit and all unit documentation. Student assessment evidence must be sufficient to allow reviewing teachers to make an accurate judgment of grade standard. Schools will use ACS to present this information for System Moderation. Criteria for each Moderation Day will be communicated to schools in the preceding calendar year.

Feedback from System Moderation

Feedback is provided to schools to affirm good practice and inform continuous improvement. This feedback is based on the BSSS Quality Assessment Guidelines and relevant course documents. It is expected that schools engage with feedback and address any longitudinal trends as outlined in the BSSS Policy and Procedures Manual.

DRAFT

Appendix B – Course Developers

Name	College
	Adelaide University
	Australian National University
German Teacher	AIS
Hindi Teacher	ED
French teacher	AIS
Korean Teacher	ED
Italian and Spanish Teacher	CE
Japanese Teacher	AIS
Indonesian Teacher	AIS
Spanish Teacher	CE

Appendix C – Common Curriculum Elements

Common curriculum elements assist in the development of high-quality assessment tasks by encouraging breadth and depth and discrimination in levels of achievement.

Organisers	Elements	Examples
create, compose, and apply	apply	ideas and procedures in unfamiliar situations, content, and processes in non-routine settings
	compose	oral, written, and multimodal texts, music, visual images, responses to complex topics, new outcomes
	represent	images, symbols, or signs
	create	creative thinking to identify areas for change, growth, and innovation, recognise opportunities, experiment to achieve innovative solutions, construct objects, imagine alternatives
	manipulate	images, text, data, points of view
analyse, synthesise, and evaluate	justify	arguments, points of view, phenomena, choices
	hypothesise	statement/theory that can be tested by data
	extrapolate	trends, cause/effect, impact of a decision
	predict	data, trends, inferences
	evaluate	text, images, points of view, solutions, phenomenon, graphics
	test	validity of assumptions, ideas, procedures, strategies
	argue	trends, cause/effect, strengths, and weaknesses
	reflect	on strengths and weaknesses
	synthesise	data and knowledge, points of view from several sources
	analyse	text, images, graphs, data, points of view
	examine	data, visual images, arguments, points of view
investigate	issues, problems	
organise, sequence, and explain	sequence	text, data, relationships, arguments, patterns
	visualise	trends, futures, patterns, cause, and effect
	compare/contrast	data, visual images, arguments, points of view
	discuss	issues, data, relationships, choices/options
	interpret	symbols, text, images, graphs
	explain	explicit/implicit assumptions, bias, themes/arguments, cause/effect, strengths/weaknesses
	translate	data, visual images, arguments, points of view
	assess	probabilities, choices/options
identify, summarise and plan	select	main points, words, ideas in text
	reproduce	information, data, words, images, graphics
	respond	data, visual images, arguments, points of view
	relate	events, processes, situations
	demonstrate	probabilities, choices/options
	describe	data, visual images, arguments, points of view
	plan	strategies, ideas in text, arguments
	classify	information, data, words, images
	identify	spatial relationships, patterns, interrelationships
summarise	main points, words, ideas in text, review, draft and edit	

Appendix D – Glossary of Verbs

Verbs	Definition
Analyse	Consider in detail for the purpose of finding meaning or relationships, and identifying patterns, similarities and differences
Apply	Use, utilise or employ in a particular situation
Argue	Give reasons for or against something
Assess	Make a judgement about the value of
Classify	Arrange into named categories in order to sort, group or identify
Compare	Estimate, measure or note how things are similar or dissimilar
Compose	The activity that occurs when students produce written, spoken, or visual texts
Contrast	Compare in such a way as to emphasise differences
Create	Bring into existence, to originate
Critically analyse	Analysis that engages with criticism and existing debate on the issue
Demonstrate	Give a practical exhibition an explanation
Describe	Give an account of characteristics or features
Discuss	Talk or write about a topic, taking into account different issues or ideas
Evaluate	Examine and judge the merit or significance of something
Examine	Determine the nature or condition of
Explain	Provide additional information that demonstrates understanding of reasoning and/or application
Extrapolate	Infer from what is known
Hypothesise	Put forward a supposition or conjecture to account for certain facts and used as a basis for further investigation by which it may be proved or disproved
Identify	Recognise and name
Interpret	Draw meaning from
Investigate	Planning, inquiry into and drawing conclusions about
Justify	Show how argument or conclusion is right or reasonable
Manipulate	Adapt or change
Plan	Strategize, develop a series of steps, processes
Predict	Suggest what might happen in the future or as a consequence of something
Reflect	The thought process by which students develop an understanding and appreciation of their own learning. This process draws on both cognitive and affective experience
Relate	Tell or report about happenings, events, or circumstances
Represent	Use words, images, symbols, or signs to convey meaning
Reproduce	Copy or make close imitation
Respond	React to a person or text
Select	Choose in preference to another or others
Sequence	Arrange in order
Summarise	Give a brief statement of the main points
Synthesise	Combine elements (information/ideas/components) into a coherent whole
Test	Examine qualities or abilities
Translate	Express in another language or form, or in simpler terms
Visualise	The ability to decode, interpret, create, question, challenge and evaluate texts that communicate with visual images as well as, or rather than, words

Appendix E – Glossary for ACT Senior Secondary Languages Curriculum

Courses will detail what teachers are expected to teach and students are expected to learn for year 11 and 12. They will describe the knowledge, understanding and skills that students will be expected to develop for each learning area across the years of schooling.

Learning areas are broad areas of the curriculum, including English, mathematics, science, the arts, languages, health, and physical education.

Frameworks are system documents for Years 11 and 12 which provide the basis for the development and accreditation of any course within a designated learning area. In addition, frameworks provide a common basis for assessment, moderation, and reporting of student outcomes in courses based on the framework.

The **course** sets out the requirements for the implementation of a subject. Key elements of a course include the rationale, goals, content descriptions, assessment, and achievement standards as designated by the framework.

BSSS courses will be organised into units. A unit is a distinct focus of study within a course. A standard 1.0 unit is delivered for a minimum of 55 hours generally over one semester.

An **Independent Study unit** is a pedagogical approach that empowers students to make decisions about their own learning. An Independent Study unit can be proposed by a student and negotiated with their teacher but must meet the specific unit goals and content descriptions as they appear in the course.

A **lens** is a particular focus or viewpoint within a broader study.

Content descriptions refer to the subject-based knowledge, understanding and skills to be taught and learned.

Familiar and unfamiliar draws a contrast between *familiar* texts, topics and language studied closely in class and *unfamiliar* material only mentioned in passing, or which the student has discovered for themselves. This encourages students to be autonomous and resilient by taking calculated risks in learning and incentivising independent work.

A **program of learning** is what a college develops to implement the course for a subject and to ensure that the content descriptions are taught and learned.

Achievement standards provide an indication of typical performance at five different levels (corresponding to grades A to E) following completion of study of senior secondary course content for units in a subject.

ACT senior secondary system **curriculum** comprises all BSSS approved courses of study.

Appendix F - Reflection and Reflexivity

Extract – Michelle Kohler and Angela Scarino, 'Chapter 7: A principled pedagogy for a multilingual and intercultural orientation to learning for diverse (language) learners' in Leonardo Veliz (ed.) *Multiculturalism and multilingualism in education: Implications for curriculum, teacher preparation and pedagogical practice*, Brill, Leiden, 2025, pp, 145 - 166

Reflective and reflexive

Reflection and reflexivity are integral to multilingual and intercultural learning. (Byrd Clark & Dervin, 2014). In language use, these processes are a crucial dimension of exchanging meanings in situ with diverse others. In language learning, these are the educative processes through which students come to understand the entailments of multilingual and intercultural exchange and how such exchange impacts people's identity formation. Kramsch (2006) reminds us that today it is not sufficient for learners to know how to communicate meanings, intricate though this is; they also need to understand the practice of meaning-making.

The process of *reflection* involves critically considering observations, descriptions, analyses and diverse interpretations of subject matter, that is, phenomena shared when communicating, as well as considering how language(s) and culture(s) come into play in exchanging meaning (Liddicoat & Scarino, 2013). The process of *reflexivity* involves recognising that participants in communication bring their own subjectivities to the exchange, situated as they are in their own social, linguistic, cultural and historical worlds. In participating in interactions with diverse others, participants learn to question their own assumptions, positioning, responses and reactions, and come to understand that their contribution to the exchange has impact and consequences; it also involves engagement with the interpretation of self (intraculturality) and others (interculturality) in diverse contexts (Liddicoat & Scarino, 2013). In other words, students make sense of the subject matter and themselves *in relation to* others. It is through reflection and reflexivity that students develop the capability to decentre and to consider matters such as situatedness, assumptions, and positionality. These processes contribute to students' development of consciousness as communicators, meaning-makers, learners and persons.

In relation to pedagogy, it is crucial to position students as both performers and analysers (Liddicoat & Scarino, 2013), and that they be invited to consider critically the ideas/knowledge exchanged, diverse perspectives, understandings and interpretations, diverse responses and reactions, and diverse ways of contributing to experiences of exchange – their own and others. They need to be invited to notice the 'language' of experiences, that is, reflecting on how diverse experiences, understandings and perspectives are expressed and represented and how perspectives, attitudes and values are enmeshed in the linguistic choices made. And finally, they need to be invited to reflect on the participants in the exchange and their identities. Over time students develop a *reflective stance* towards understanding the variable ways of communicating.

In order to resource the processes of reflection and reflexivity, it is necessary to purposefully include texts (in the widest sense of the term) that present differing perspectives and to model reflective thinking, introducing questions about such matters as voice; assumptions, feelings in relation to responses, the exploration of reasons, motivations, origins of particular views, and so on.

Ultimately, the goal of multilingual and intercultural communication and learning is the development of sensitivity towards aspects of communication (i.e. the exchange of meanings)

between 'self' and 'others', through critical engagement with self-reflection. This also entails developing awareness of the ethical issues related to the use of knowledge and language.

DRAFT

Appendix G – Language Specific Information

This appendix contains specific language features relevant to the language courses available for study, such as structures and grammatical content appropriate for students at this level. The appendix is a suggested guide only and is not limited to features of language that could be covered in the delivery of course content descriptions. The language features are not unit specific and are a guide to planning.

Prior to these features are some cues to essential understandings within each language.

The collection of conceptual understandings in the form of questions is provided to guide teaching and learning in senior language classes. This captures the nexus of language/culture through questions that ‘carry’ the teaching and learning; the grammar is the enabler, not the goal. Deep understanding and appreciation of, and a growing capability to meaningfully engage with and reflect on, culture and language and personal growth and understanding is the goal.

The Implementation Guides provide more detailed guidance on the scope, complexity and insight required in each unit.

Beginning Arabic

Essential Understandings

1. How and why do dialects and spoken educated Arabic differ?
2. How does the Arabic language shape and reflect the way Arabs think and view the world?
3. How, when and where is Modern Standard Arabic (MSA)* used in the Arab world and Arabic speaking communities overseas?
4. How do the Standard Arabic and Arabic dialects contribute to the understanding of regional history, culture and religion?
5. In what ways does Arabic language and body language differentiate between formal and informal relationships?
6. How is the gender of nouns and verbs applied in the Arabic language?
7. How do verb tenses influence how Arabic-speakers express themselves and understand the world?
8. How can the Arabic language contribute to promoting a fair and just society, valuing diversity?
9. What are some of the tensions that exist between tradition and modernity in the Arab world and Arab-speaking communities overseas?
10. How have Arabic language and culture influenced other countries?

* *Note: Modern Standard Arabic (MSA) is sometimes called Standard or Formal Arabic.*

Beginning Arabic Grammar

Functions & Topics	Structures	Examples
Arabic Letters and Sounds	<ul style="list-style-type: none"> • <i>Alif, Baa, Taa, Thaa, Jeem ...</i> 	أ ب ت ث ج
One-way connecting letters	<ul style="list-style-type: none"> • Letters that can be connected from the right side only. • ا د ذ ر ز و 	برر ، طور ، زور
Nouns	<ul style="list-style-type: none"> • Gender: Masculine & feminine • Definite and indefinite 	تلميذ ، تلميذة القلم ، قلم
Adjectives	<ul style="list-style-type: none"> • Agreement and placement 	بنيت ذكية
Short Vowels	<ul style="list-style-type: none"> • Diacritical marks 	ب ، ب ، ب

Functions & Topics	Structures	Examples
Long Vowels	• Three letters: ا و ي	طالب ، طول ، ميل
Conjunctions	• Connecting words and sentences: إما و	أحمد و علي سافرا إلى أستراليا
Prepositions	• Location and direction • Time	في ، إلى
Pronouns	• Demonstrative • Possessive	هذا ، هذه ، ذلك ، تلك حقيبي
Verbs	• Past tense • Present tense • Imperative	كَتَبَ يَكْتُبُ اُكْتُبْ
Negation	• Using ليس لا	ليس معي نقود
Cardinal numbers	• 1 to 10	10 9 8 7 6 5 4 3 2 1
The question particles	• Using the particle: هل	هل عندك سيارة ؟
Subject and Predicate	• Nominal sentences	الرجل طويل
Ordinal numbers	• The First, the Second, the Third, the Fourth, the Fifth	الأول ، الثاني
Possessive (Idafa) structure	• Possessive sentence	باب البيت
Telling Time	• Formally and informally	الساعة الواحدة

Beginning Chinese

Essential Understandings

1. How do tones influence meaning and phonetic expression in Chinese?
2. What is the significance of sides and radicals in Chinese characters?
3. Why is stroke order so important in writing Chinese characters?
4. How does the Chinese language reflect the country's unique identity?
5. How are ideas and opinions given and justified in Chinese?
6. How have Chinese language and culture influenced other countries?
7. What are the implications of Chinese zodiac signs in understanding personality?
8. What are the different ways of expressing politeness in the Chinese culture?
9. How do Chinese-speaking people choose appropriate questioning, such as asking about age?
10. What is the role of food in cultural festivals?
11. How is etiquette expressed in Chinese, such as giving and accepting presents?
12. In what ways have other languages and migration influenced Chinese language and Chinese-speaking communities?
13. How are tones and intonation used in Chinese poetry?

Beginning Chinese Grammar

Functions	Structures
Parts of Speech	
Nouns common proper	人,书,老师 堪培拉中学
Pronouns personal demonstrative	我(们),你/您(们), 他/她/它(们) 这,那 这儿/这里,那儿/那里
Interrogative	谁,什么,哪 哪儿?

Functions	Structures
	几,多少, 怎么, 什么时候
Numerals counting	零,一,二,三,四,五,六,七, 八, 九,十, 百, 千, 万, 十万, 百万
Verbs action emotive auxiliary direction	走,看,写, 说, 听, 读, 吃, 买, 卖, 坐, 骑 喜欢,觉得,知道,爱 能,会,要,可以,应该 上/下,来/去/回
Adverbs frequency sequence linking quantity degree negation progress	经常, 常常, 不常, 通常, 再, 总是, 有时 候 就, 才, 刚 也, 还 都, 只 很, 非常, 最 不, 没(有) 正在, 正, 在
Adjectives monosyllabic disyllabic monosyllabic (colours) nouns as adjectives	大/小, 多/少, 长/短 高兴 白, 红, 蓝, 黑, 绿 男, 女
Prepositions distance position direction object focus	从, 离 在 对, 给

Functions	Structures
comparative	把 比
Conjunctions linking (pro)nouns alternative phrases	和, 跟 还是 (question), 或者 (statement) 因为... ..所以 可是/但是 but, 又 又(linking two verbs or two adjectives)
Particles structural modal	的 (possessive) 的 (attributive) 得 (complement) 地 (adverbial) 吗, 呢, 吧 了
Sentences with verbal predicates 动词谓语句	我要学中文。 I want to learn Chinese.
“Shi” sentences “是”字句	她是我们的中文老师。 She is our Chinese teacher.
“You” sentences “有”字句	他有个兄弟。 He has a brother.
General questions with ma, ne. 用“吗”“呢”的一 般疑问句	她是中学生吗? Is she a high school student? 我吃米饭, 你呢? I eat rice, how about you?
Sentences with adjectival predicates 形容词谓语句	我们都很高兴。 We are all happy.
Sentences with nominal predicates 名词谓语句	迈克十七岁。 Michael is 17 years old.

Functions	Structures
Negative sentences with 不用 “不” 的否定句	我不去看电影了。 I am not going to watch the movie.
Imperative sentences to express a request or an order 表示请求和命令的祈使句	请进! Please come in! 别在这抽烟! Don't smoke here.
Exclamatory sentences 感叹句 Adverbs of degree as adverbials 程度副词作状语	太好了! So good! 很/太/非常 very, 特别 especially, in particular, 真 really 学生们非常努力。 Students work hard.
Common measure words 常用量词	Nominal measure words: number + measure word + item 个 (one of persons or one unit of items), 种 (a kind of), 只, 条, 头 (referring to one kind of animal), 张 (one item with a surface), 台 (a machine or an equipment), 枝/串 (a twig, a branch of), 件 (a piece of garment), 幅 (one painting), 副 (眼镜 one pair of glasses), 对/双 (one pair of), 块 (one block of), 斤 (half of a kilo), 粒/颗 (one tiny item), 把 (referring to an item with a handle or support), 座 (a building of) 米, 公里 (distance) 斤, 公斤 (weight)

Functions	Structures
	块(元),毛(角),分 (currency) 点钟),刻, 分钟 (time)
Locations as adverbials 地点状语	在 at, in, on 我们在堪培拉工作。 We work in Canberra.
Usage of “de” “的” 字的用法 (1) The possessive de, 表达所属关系的 “的” (2) “de” used as a classifier 表达类别的 “的” (3) 强调过去动作的 “的” Used to emphasise an action that happened in the past	这是我们的计算机。 These are our computers. 我吃甜的。 I want to eat the sweet one. 我们是坐飞机来的。 It is by plane that we have flown here.

15. How is the development of technology impacting Spanish language?
16. How does learning Spanish broaden social and intercultural knowledge of Spanish culture?
17. How have Spanish language and culture influenced other countries?

Beginning Spanish Grammar

Students should be aware of different levels of language, for example, formal and informal. This includes the use of colloquialisms, where they are appropriate, and an awareness of country/regional differences. It should be noted that, where regional variants are used, it is also important to provide internationally recognised alternatives.

Beginning Spanish Grammar

Grammar elements	Structure	Example(s)
Nouns	<ul style="list-style-type: none"> gender number compound nouns common borrowed words 	<i>el niño, la niña, el amor</i> <i>los niños, las niñas, las clases</i> <i>el supermercado</i> <i>el fútbol, el líder</i>
